

Your Source For Desiccants

Desiccants - Clay

Use to protect products vulnerable to moisture damage during storage and transport.

- Ideal for protecting pharmaceuticals, nutraceuticals, diagnostics, electronics and food.
- Activated clay desiccant filling is a free flowing granular material with high moisture adsorbing ability from 20-80% relative humidity under normal packaging and storage conditions.
- Meets FDA specifications for direct contact with food and drugs.
- Choose from Kraft or Tyvek® Bags – both are strong, durable and allow for extremely high adsorption rates.
